

# Future-proof your fax number

Plans as low as:

**\$995 /mo.**  
+ 10c / fax send

Access and manage faxes from your business email. Virtual Fax means you can get rid of your old-fashioned fax machine without losing your fax capability.

Business

## Custom fax cover page

Having a custom cover page attached to your faxes will show the recipient you are professional and will allow them to clearly identify you.

Your custom cover page features your company logo, personal details and a clean layout. This will be a more impressive option compared to a regular default cover page.

## NBN Ready

Replace your fax machine with our NBN ready virtual fax service. It will work with all internet enabled devices and will make your business future proof.

## PDF Simplicity

Send and receive your faxes as PDF files through email. Our cloud fax technology lets you send large files at high quality.

## Low-cost faxing

Stop paying for expensive fax lines and equipment. Receive Fax documents for free, and pay just 10c per fax to Australian numbers.

## BYO Number

Bring your current fax numbers with you when you switch to MyNetFone. It's free to transfer your numbers from another provider.

## Requirements

### Email and internet

Virtual Fax is compatible with all modern internet browsers: Internet Explorer 8.0+, Chrome 12.0+, Firefox 13.0+, Opera 15.0+ and Safari 5.0+. Virtual Fax email capabilities are compatible with all major business email clients, including: Microsoft Outlook, Google G Suite and Apple Mail.

### Fax number

Virtual Fax requires an active fax number. If you do not have an active number, we can provide you with a new fax number for your local area. Additional charges may apply if you want an out-of-area number or custom number. Alternatively, you can bring your existing fax number to MyNetFone Business - for free.
